

The Sales, New Homes and Rental departments at Hurford Salvi Carr are established experts in the design and marketing of new apartments in converted office and warehouses buildings together with new build developments across central London and in particular, the City, Midtown and Docklands. We work with developers and house builders as part of their

development team, from the initial site appraisal and acquisition, to the design and layouts of the individual apartments. Working with project architects to determine the level and specification of finishes, ensures that the product is of a sufficiently high standard and targeted to our market, enabling the developer to maximise the return from the project.

Since 1996 we have acted as the marketing agents on over 200 developments and continue to be a leading agency in the marketing of new residential and mixed use developments in central London.

## Year Development
